SUMMARY

AI engineer specializing in production LLM systems: agentic workflows (LangChain, LangGraph), RAG with embeddings and vector search, and LLM infrastructure. 6 years in production software, 2+ on AI/LLM: built a LangChain/LangGraph + Gemini agent, a Text-to-SQL RAG engine (75% accuracy, 200+ schemas), and a token-metering platform cutting LLM costs ~90%. Full-stack: Python, FastAPI, Java, Node.js, React on GCP. Leads 5 engineers.

EXPERIENCE

Senior Full Stack Developer

Nov 2022 – Present

AsInt

Ahmedabad, India

- Designed a **production-grade agentic workflow** using **LangChain/LangGraph + Gemini** with **human-in-the-loop** controls, automating multi-step inspection creation and reducing research effort by **30%**.
- Built a **Text-to-SQL engine from scratch** using schema-grounded **RAG** with **embeddings** and **guardrails** against **destructive SQL** and **cross-tenant leakage**, achieving **75%** accuracy across **200+ schemas**.
- Built a **production LLM observability and token-metering platform from scratch**, replacing **Langfuse** – five-tier request pricing, **request-level tracing**, **audit trails**, and **prompt caching** that cut LLM token costs ~**90%**.
- Architected a **multimodal document extraction pipeline** using **Gemini vision LLM**, achieving **90% field-level accuracy** across document workflows, with page images served via **GCS URLs** to a **React UI**.
- Built a **real-time notification service** using **PostgreSQL WAL-based CDC**, where a **Mistral LLM** classifies and prioritizes events, delivering alerts to **1,000+ users** within **20s** via **WebSockets** to a **React UI**.
- Re-architected** a legacy monolith into a **multi-tenant SaaS platform (Node.js, MongoDB)** with **Java/React SSO (Enterprise IDP + OTP)**, isolating **10 tenants**; **+20%** throughput, **40%** faster login.
- Lead engineer** for the team's AI systems, owning **architecture** and end-to-end delivery; drove **build-vs-buy** decisions through RFCs and mentored **5 engineers** across design, implementation, and production deployment.
- Trained and deployed a custom YOLOv11** document-layout model using **PyTorch** on **Google Cloud Run**, achieving **80% mAP@0.5** across **2,500+ annotated document images**.

Associate Software Developer

Sep 2020 – Sep 2022

Incture Technologies

Bengaluru, India

- Shipped a **MERN real-time messaging platform (WebSockets, JWT, MongoDB)** for **1,000+ users**, and a reusable **Jest-tested React** rich-text editor (**TinyMCE**) adopted across **7 products**.

PROJECTS

- CryptoLens** – RAG research agent over a crypto analyst's **YouTube** archive; scraped **2,000+ transcripts**, applied **chunking** and **BGE-M3** embeddings, and indexed in **Qdrant**. Built **hybrid search** with **temporal reranking**, cross-time **contradiction detection**, and **citation-grounded answers** with video + timestamp references using **Groq (Llama 3.3 70B) + Gemini**, with **Streamlit + Telegram**.

EDUCATION

Bachelor of Engineering, Siddaganga Institute of Technology

2016-2020

Computer Science and Engineering - 8.5/10

SKILLS

AI & Machine Learning	Agentic Workflows (LangChain, LangGraph, Tool/Function Calling), RAG, Embeddings (BGE-M3), Vector DBs (Qdrant), Hybrid & Semantic Search, LLM APIs (Gemini, Mistral, Groq/Llama), Prompt Engineering, Text-to-SQL, LLM Observability, Token Metering & Cost Optimization, Multimodal/Vision-LLM Extraction, Computer Vision (YOLOv11, PyTorch)
Back-End	Python, FastAPI, Java, REST APIs, Node.js, TypeScript, WebSockets, Event-Driven Architecture (CDC)
Front-End	React.js, TypeScript, Redux, Material UI, Tailwind CSS
Data & Cloud	PostgreSQL, MongoDB, MySQL, Firebase/Firestore, GCP, Google Cloud Run, Docker, Git, CI/CD
Security & Practices	AI Guardrails, Multi-Tenant Isolation, OAuth2/OIDC, SSO (Enterprise IDP), JWT, Distributed Systems, System Design, Testing (pytest, Jest, JUnit, Mockito), Agile
